

# TC-710 RECYCLING BALER

The TC-710 Baler reduces the amount of space needed for recyclable material.

The TC-710 comes standard with a 5" Cylinder, an oil cooler and delivers 45,160 lbs of crushing force. It reduces 150 lbs of aluminum cans and P.E.T. Bottles to a 20" x 20" x 36" bale in under 7 minutes, 140 lbs of H.D.P.E. Bottles in under 20 minutes. Standing only four feet high the convenient opening in the top of the TC-710 provides for easy loading (See Fig. A) while the finished bale is removed from the bottom compartment\* (See Fig. B). The optional drip pan is ideal for catching liquid run off (See Fig. C).

The TC-710 is easily set up for 10 h.p. 220-volt, three-phase in-plant operation, or 18 h.p. gasoline engine.
